- Then the finished articles are then placed onto the largest platform in the world.
- Millions of customers will see your designs and when they purchase, everything is taken care of for you.
- The item is package and shipped to the customer at no cost to you.
- You are then paid a percentage of the selling price straight into your account.
- The percentage is around 25% of the selling price and the rest goes towards all other costs, including the item itself, postage, etc.
- Therefore, all you need to do, is use the latest software to create different designs, it's as easy as copy and paste.

Amazing Earning Potential

This is a fully automated system and you can make serious, passive income by simply loading your designs into the system and then sit back and waiting for your sales and commissions.

All you need is just 1 good design that people like and it can go mad.

Selling worldwide, just 1 t-shirt with a funny slogan could make you a fortune!

Lets just concentrate on one T shirt selling 100,000 copies worldwide, which when you think about it, is really quite small.

If your t shirt sells for £18.99, less 25% = £4.75 you will earn per sale

(This can vary slightly depending on the costings of each item).

So, $£4.75 \times 100,000 = £475,000$ from just 1 T-Shirt.

Now it's a numbers game, so the more designs you enter into the system the more chance you'll hit the jackpot with a great design that sells massively.

But, in the mean time, say you have 100 T-Shirt designs in the system and they are all selling just a few hundred each month, you'll still be earning an amazing passive income for not doing a great deal, all as you wait for that smash T-shirt, Bag, hoddie that explodes and makes you a fortune!

With an average commission of $£4.75 \times$ just 500 sales (Worldwide) = £2,375.00 in 1 month. Not a bad passive income!
